CROATIAN HPC DAYS 2026 · SRCE ZAGREB · TUESDAY 24 NOVEMBER

Get ready in 30 minutes.

On the day we build, we don't install. Do these three steps at home, before Monday 23 November.

What you need

☐ Your own laptop and its charger. If it is a work laptop and it blocks installing, don't work around your IT rules: bring a private laptop or tell us before the day.

☐ A paid plan on your own account: **Claude Pro** or **ChatGPT Plus**, each about USD 20 a month, cancel any time. Free accounts are not enough.

☐ About 30 minutes.

1 Install one tool and log in 15 min

Pick one. Both work for the whole day. Already pay for one of them? Take that one. Never used a terminal? Take the app.

Claude Code by Anthropic · needs Claude Pro

App (easiest)

Install the Claude desktop app from claude.com/download, log in, open the **Code** tab.

Or terminal · macOS, Linux

```
curl -fsSL https://claude.ai/install.sh | bash
```

Or terminal · Windows PowerShell

```
irm https://claude.ai/install.ps1 | iex
```

Open a new terminal, type `claude`, log in in the browser.

Codex by OpenAI · needs ChatGPT Plus

App (easiest)

Install the ChatGPT desktop app from chatgpt.com/download, log in, choose **Codex**.

Or terminal · macOS, Linux

```
curl -fsSL https://chatgpt.com/codex/install.sh | sh
```

Or terminal · Windows PowerShell

```
powershell -ExecutionPolicy ByPass -c "irm https://chatgpt.com/codex/install.ps1 | iex"
```

Open a new terminal, type `codex`, choose “Sign in with ChatGPT”.

No admin rights needed. A free Claude account does not include Claude Code. ChatGPT Free has Codex only in the desktop app, with tight limits: not enough for a day. Other tools are welcome, but on the day we can only help with these two.

2 Get the starter folder 5 min

Open github.com/AIAT-AIandBusinessgrowth/build-sessions-starter. Click **Code** → **Download ZIP**. Unzip it (Mac: double-click; Windows: right-click → *Extract All*). Put the folder somewhere easy, for example on your desktop. With Git, `git clone` works too.

Please do this at home. 48 people downloading on one Wi-Fi is slow.

3 The test: type `start` 5 min

1. **Open the starter folder in your tool.** App: open the folder. Terminal: go into the folder, then type `claude` or `codex`.
2. **Type `start`** and press Enter.
3. **The agent asks its first question**, marked “Question 1 of 3”, with numbered example answers.

You see “Question 1 of 3”? Stop here. You are ready. There is nothing to build yet. On the day you open the same folder and carry on.

If the tool asks for permission to read or write files, “yes” is fine inside this folder.

If something doesn't work

If you see …	… do this
“command not found” right after installing	Close the terminal and open a new one. Still missing? Take the desktop app instead.
The login page doesn't open	Copy the link from the terminal into your browser. In Claude Code, press `c` to copy it.
Codex says it can't create files	Type `/permissions` and choose **1. Ask for approval**. Never choose Full Access.
You type `start`, but no “Question 1 of 3”	You opened the wrong folder. Open the folder that contains `README.md` and `AGENTS.md`, not a folder inside it or around it.

Rule one: only made-up data

No real names, customers, files from work, passwords or keys, not even in the test. Personal AI subscriptions have no data processing agreement with your organisation, so the agent invents the sample data for you.

Prefer Croatian? There is a Croatian starter folder with a Croatian version of this guide. Pick the one you like.

Still stuck? Just reply to your registration e-mail. See you on Tuesday 24 November, 09:00 at SRCE (room open from 08:30).

Checked on 2 November 2026 with Claude Code 2.1.316 and Codex 0.166.0, against code.claude.com/docs, claude.com/pricing and learn.chatgpt.com/docs. If the vendor page says something else, the page wins.

AI Agents: From Buzzword to Reality · Bernhard Götzendorfer, AI Factory Austria AI:AT · Croatian HPC Days 2026. AI Factory Austria AI:AT is funded by the EuroHPC Joint Undertaking under grant agreement No 101253078.
